

Capabilities Statement

Lexair

Lexair Electronics Sales Corporation is a WBENC/WOSB certified global supplier of voice and video communications technology, hardware and services. For 25 years, Lexair has enabled Fortune 500 companies and federal, state and local governments to strategically purchase, deploy and manage their voice and video technology, device endpoints and services across their organizations. As a trusted Tier-1 supplier, Lexair advances our customers' business goals in a highly customized and cost-effective way. We supply and support customers who operate multiple facilities across the United States, or the world, ranging from 4 to more than 2000 site locations, plus WFH populations, and employing 10,000 to over 400,000 employees.

Our Mission:

We strive to eliminate the hassle of acquiring, deploying and maintaining voice and video communication technology, device endpoints and services by building a supplier-partner relationship. By investing in our customers, we provide the best customer-centric service, specialized customer programs, competitive prices and on time delivery. Through flexibility, focus, creativity, resilience, and determination our team offers a consultative approach to supporting each customers' unique requirements.
