

Choose the right solution

When you're looking for the perfect headset, there are things you need to consider.

Where are you working?

At office desk
You spend most of your time in the office, at the desk and on the phone.

Around the office
You spend more time in the office than on the road but you need freedom in the office to perform.

On the go
You spend more time on the move and you need to be able to work from anywhere.

What do you want to connect

You'll need to consider your connectivity needs to make sure your headset solution is compatible with your phone system. You can always contact a Jabra reseller if you need more advice.

Traditional desk phone

Softphone/Voip

Smartphone

Tablet

Multiple devices

How noisy is your work environment

Whether it's a little chatter in the background or a colleague sitting right beside you, the right speakers help you get the most out of your calls while the right microphone delivers quality sound on the other end – where it really counts.

Low noise
Omni-directional microphones pick up sound from any direction and block ambient and surrounding noise. Fine for the traditional, low-noise office.

Average noise
Noise canceling microphones and a mono speaker reduce unwanted background noise while ensuring you're still aware of your surroundings. Great for use in noisier, open office environments.

High noise
Noise/ultra noise canceling microphones combined with duo speakers filter aggressive noise and can block the sound of someone sitting right beside you. Perfect for very noisy, distracting environments.

Wireless or corded?

Wireless headset solutions
Great if you want to move away from the desk or if you want a streamlined cordless design.

Corded headset solutions
Perfect if you only work at your desk and you want the best possible sound quality in one or both ears.
